

Internet Most Restrictive Filter Request
Clayton Ridge Community School District
1:1 Digital Learning Environment

Installed on all Clayton Ridge student machines is a mobile internet filter. This filter is intended to block all adult internet content. Parents have an option to request a more restrictive filter environment to mimic the same filtering environment as offered during the regular school day. This more restrictive filter denies access to adult content, social networking sites and other related material. Please complete the enclosed request form to implement the more restrictive filter environment on my child's laptop while at home.

I request the more restrictive filter for the school issued laptop for my child.
